Warfighter Training Support Package for

Perform Transient Personnel Accountability

📄 **WTSP Information Document**

Condition: The Theater Gateway Personnel Accountability Team (TG PAT) is deployed to an area of operations and providing theater-level support at the Aerial Port of Debarkation (APOD) or Sea Port of Debarkation(SPOD). The TG PAT is augmented by a Human Resources (HR) Company with four platoons and a Plans and Operations Division. The TG PAT establishes the initial Personnel Processing Center (PPC) to track and account for all Soldiers, Department of Defense (DOD) civilians, and Joint, Interagency and Multinational (JIM) personnel arriving into and departing from the theater. Communications are established with the theater Army Service Component Command (ASCC) G1, Human Resources Sustainment Center (HRSC), the HR company and the sustainment brigade provide logistical support, casualty liaison teams, and control elements at the APOD/SPOD. The TG PAT is equipped with the Deployed Theater Accountability Software (DTAS) as the accounting system of record for all transiting personnel. Standing Operating Procedures (SOPs) for the theater and element are on hand. Terrorists and other hostile force sympathizers are operating in the area. Some iterations of this task should be performed in MOPP.

Standard: Obtain and enter personnel data for all incoming and outgoing Soldiers, DOD civilians, and JIM personnel into the theater database with 100 percent accuracy. Provide theater ASCC G1 and HRSC daily updates on personnel information and strength related data. At MOPP4, reduce personnel accounting and strength reporting activities to minimum actions required for immediate mission accomplishment.
